Build America, Buy America Act

What is BABA?

The Build America, Buy America (BABA) Act is a federal initiative designed to strengthen domestic manufacturing by requiring infrastructure projects that receive federal funding to use American-made materials, including iron, steel, manufactured products, and construction materials. Enacted as part of the Infrastructure Investment and Jobs Act (IIJA), BABAA aims to boost U.S. industry, create jobs, and ensure taxpayer dollars support American businesses.

Antaira's Industrial Switch Designed for BABA

Antaira's industrial switch model **LMX-1204G-SFP-T-BABA** complies with the Build America, Buy America (BABA) Act, ensuring domestic sourcing for federally funded infrastructure projects. This model is the first in a series of BABA compliant network switches. Engineered for reliable, high-performance networking, this industrial switch provides connectivity for transportation, energy, and manufacturing. With PoE, fiber connectivity, and industrial-grade durability, it will support applications in harsh environments while maintaining BABA compliance. Featuring a rugged metal housing, wide temperature tolerance, and redundant power input, it is built for long-term reliability in extreme conditions.
